SUMMARY PROFILE

Information Systems student with hands-on experience in designing **Data Warehouses**, developing **ETL** pipelines using Pentaho Data Integration, writing SQL queries in PostgreSQL, and building **Business Intelligence** dashboards using **Metabase**. Passionate about transforming raw data into actionable business insights.

EDUCATION

UPN Veteran Jawa Timur Surabaya, Jawa Timur
SI Information System | GPA : 3.88/4.00 2022 - Present

- Relevant Course : **Data Analyst**, UI/UX Design Principles, **Business Intelligence**, Business Development, Web Development
- Additional Information : Dashboard visualization with Tableau, Web Development with PHP and MySQL

INFORMAL EDUCATION

PT Revolusi Citra Edukasi (RevoU) Online, Jawa Timur
Data Analyst & Gen AI Sept 2024 - Dec 2024

- Developed expertise in data cleaning, dashboard visualization, and SQL queries.
- Conducted business case analysis, delivering actionable insights through Power BI dashboards.
- Collaborated in a team to solve real-world problems, focusing on generating effective data-driven solutions.

Infinite Learning (IL) Online, Jawa Timur
UI & UX Design Workshop: Designing Engaging and Intuitive User Experiences May 2024

- Gained a strong foundation in designing user-friendly interfaces and understanding user needs.
- Applied design thinking principles to create a simple mockup of an e-commerce application.

EXPERIENCE

PART-TIME ADMINISTRATIVE STAFF Surabaya, Jawa Timur
Packindo.id Apr 2025 - Present

- Created and managed delivery orders (surat jalan) to support daily operational activities.
- Prepared sales and purchase invoices accurately and in a timely manner.
- Maintained and updated inventory stock data to ensure data accuracy.
- Updated and managed administrative data related to transactions and operations.
- Utilized Microsoft Excel to recap and manage pricing data efficiently.

PROJECT - BASED INTERNSHIP at UPA TIK Surabaya, Jawa Timur
Business Intelligence Intern Feb - Present

- Designing a **data warehouse** structure (fact and dimension tables) based on community service activity data, from identifying data requirements to developing a **multidimensional** schema.
- Performing data extraction from the operational database, data transformation, and loading data into dimension tables and fact tables using **Pentaho Data Integration** tools.
- Developing a web-based interactive dashboard for data visualization with filtering features based on dimensions such as time, instructor, and activity type.

BUSINESS INTELLIGENCE at DiBimbing Surabaya, Jawa Timur
Business Intelligence Student Apr 2024

- Learned how to process data for visualization. Data was taken from Kaggle, followed by cleaning the data to remove inconsistencies before **visualizing** it using **Tableau** for easy comprehension.
- The data used was related to the categories of movies and TV shows on Netflix, and it was found that the highest number of **users 2,818**, were from the United States.

ORGANISATION

CREATIVE EVENT at OMAH JIWA

Surabaya, Jawa Timur

Division Head

Jan 2024 - Apr 2024

- Planned and organized Instagram live events twice a month, a webinar once a month, and one campaign. Conducted evaluations after each event.
- All activities were executed according to the agenda: two Instagram live events per month, one webinar per month, and one campaign, with a total audience of **over 100 participants**.

ENTREPRENEURSHIP DEPARTMENT

Surabaya, Jawa Timur

Vice Department Chair

March 2024 - March 2025

- Sold digital products and food products to the entire KM Sifo community and conducted weekly records of the income generated.
- The total net income from all programs **exceeded 10,000,000**, demonstrating the full success of the activities.

PROJECTS

Dashboard Business Intelligence Dashboard for Lecturer Community Service Performance

Developed a data-driven **Business Intelligence** system for analyzing community service (PkM) activities using a data warehouse approach.

- Designed a Kimball data **warehouse** with 3 fact tables and multiple conformed dimensions.
- Built **ETL** pipelines using Pentaho Data Integration.
- Developed interactive dashboards using **Metabase**.
- Created SQL queries for KPI, trends, and **multidimensional analysis**.
- Integrated **OLAP** for drill-down and slice-and-dice analysis.

US Furniture Dashboard Visualization

Created a data-driven dashboard for US Furniture sales analysis using **Power BI**

- Conducted in-depth analysis on the Global Superstore dataset using **Spreadsheet** and **Python**.
- Designed insightful **visualizations** to identify trends, improve decision-making, and communicate findings effectively.

Easy Nutrition Access for Better Health - Mobile App UI/UX Design

Designed a mobile application focusing on nutrition awareness and health improvement using the design thinking methodology

- Conducted user research and defined problem statements during the Empathize and Define stages using FigJam.
- Generated ideas and crafted wireframes during the Ideate stage.
- Created high-fidelity prototypes of the mobile application using Figma.
- Iterated designs based on user feedback during the Prototype and Test stages.
- Presented the final project outcomes to stakeholders as part of the deliverables.

SIBOOK - Library Management System

Developed a desktop-based library management system using Visual Basic in Visual Studio

- Designed and implemented core features: book data management, member registration, borrowing, and returns, improving operational efficiency.
- Integrated **Crystal Reports** for generating reports and applied **error handling** to enhance system stability.
- Created a user-friendly system with **10 functional forms** for streamlined data access and management.
- Achieved a final grade of **3.75/4**.

D'Oembah - Laundry Service Mobile Application

Developed a mobile laundry service application using Flutter with **FastAPI** and Firebase integration

- Implemented key features: location-based laundry search, order placement, service filters (regular and express), and real-time order status tracking for customers and admins.
- Utilized **Python** for backend development, ensuring high performance and reliability with a local API.
- Enhanced user experience with an attractive UI and responsive functionality for laundry businesses and customers.
- Achieved a final grade of **4/4**.

Pilah Cantik - Waste Management System

Built a web-based system for managing cosmetic packaging waste using **PHP** and **MySQL**

- Designed core functionalities to enable tracking of waste transactions, financial records, and stock data for both customers and collectors.
- Deployed using **XAMPP** for efficient development and database management.
- Achieved a final grade of **4/4**.

ACHIEVEMENT

Certification Name

Surabaya, Jawa Timur

LEARNING THE BASIC OF SQL /Dicoding Indonesia

Jan 2024

- Learned the basics of SQL, such as performing CRUD operations.
- Successfully completed the course with a score of **100/100**.

Certification Name

Gresik, Jawa Timur

GETTING STARTED WITH PYTHON PROGRAMMING /Dicoding Indonesia

Jan 2024

- Learned the basics of Python programming, from initial introduction to preparation in Python programming.
- Successfully completed the course with a score of **100/100**.

Certification Name

Gresik, Jawa Timur

JUNIOR WEB PROGRAMMER CERTIFICATION / BNSP

Maret 2025

- Certified in fundamental web programming competencies, including HTML, CSS, JavaScript, and basic front end development.
- Demonstrated ability to develop and manage simple web applications based on industry competency standards..

SKILLS

Technical Skills : SQL (PostgreSQL, MySQL), Data Warehouse & ETL (Pentaho Data Integration), Business Intelligence (Metabase, Power BI), Data Analysis (Python, Microsoft Excel)

Programming : Python, Java, PHP, Dart

Frameworks : Laravel, Next.js, Flutter, FastAPI

Soft Skills : Analytical Thinking, Problem Solving, Teamwork, Communication, Time Management

Language Skill : Indonesian (Native), English (Proficient)
